AutoCAD uses a mouse-based interface, which means that it is possible to control most aspects of the program via the mouse. Additionally, the AutoCAD commands used by the user must be in the form of a mouse click, which in turn is usually combined with other mouse operations to instruct AutoCAD to perform a specific action. The program is noted for its quick learning curve and powerful capabilities. As of 2015, AutoCAD is available on Windows, Linux and macOS operating systems. AutoCAD is also available as an online app, an iOS and Android app, as well as as a mobile app available via the App Store and Google Play. AutoCAD runs in several languages, including English, French, German, Portuguese, Japanese, Simplified Chinese, and Traditional Chinese. History The first AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers, as was typical in those days. AutoCAD was developed by the late Jack Trammell, who was in charge of architecture and design at Autodesk at the time. An earlier program, Autodraw, was a predecessor to AutoCAD. AutoCAD was first sold in 1984 by the new company Autodesk Inc. In 1987, Autodesk became a public company. Autodesk has expanded over the years, and by 2005 it had offices in 10 countries and had 7,000 employees, including 2,000 at its San Rafael, California headquarters. In 2004, Autodesk acquired the computer-aided design (CAD) company Pixologic. At the time of the acquisition, Autodesk also bought Autodesk Media and Entertainment, which included the digital rights for Autodesk Animator software. In 2007, Autodesk acquired Navisworks for US$350 million. With the acquisition of Navisworks, Autodesk gained NavisGroup, a company specializing in robotic CAE. Navisworks is now the company's leading software suite for advanced robotics and haptic technologies. Autodesk also acquired the customers of Ultimaker, a CAD/CAM software for stereolithography printers, the Apple Education market and the operations of the 3D printing service Shapeways. In 2009, Autodesk acquired SolidWorks Corporation for US$1.32 billion. In 2011, Autodesk acquired the German-based software company SARIS. SARIS specialises in
